2018.4

October 11, 2018

This version of Wolf EMR provides new features, enhancements, several new and updated SMART forms, and fixes.

Some enhancements or new features were implemented as a result of ideas that our users suggested on the [Wolf EMR community portal](https://telushealthcommunity.force.com/wolfcommunity) (<https://telushealthcommunity.force.com/wolfcommunity>). We encourage you to continue to submit new ideas and to vote for and comment on existing ideas!

Prov.	New feature or enhancement
All	"Automated fee code updates in British Columbia" below
All	"Auto-correct for front-end staff" on the next page
AB and BC	"Verify button for front-end staff" on the next page
All	"Miscellaneous enhancements" on page 6
All	"Administration enhancement" on page 6
All	"Performance enhancements" on page 6
All	"New or changed SMART forms" on page 6
All	"Fixes" on page 8

Automated fee code updates in British Columbia

Users suggested this new feature as an idea on the Wolf community portal: [Automate fee code updates](#)

In British Columbia, you can now configure your Wolf EMR to automatically update the MSP and WorkSafeBC fee codes. When enabled, each night at 2am, the EMR checks for new or updated fee codes and, if one is available, performs the update.

To enable this service, on the Wolf EMR home page, click **Configuration**  > **Billing Configuration** tab and select the **Enable Automatic Fee Code Updates** check box. For more information, see "Updating your MSP fee codes" in the online help.

Auto-correct for front-end staff

Users suggested this new feature as an idea on the Wolf community portal: [Auto-correct for staff](#)

Front-end staff can now use auto-replace of text for booking notes and patient instructions in the **Patients To Notify** and **Appointments To Be Made** windows. This makes entering long patient instructions more efficient. See "Using auto-replace text" in the Wolf EMR help.

Verify button for front-end staff

Users suggested this new feature as an idea on the Wolf community portal: [Verify button in scheduler](#)

In Alberta and British Columbia, to make verifying patient demographics more efficient, you can now mark patient data as verified within the **Verify Patient Details** window that opens when you mark a patient as **Arrived** in the scheduler. See [Verifying patient data](#) "Verifying patient data" in the Wolf EMR help.

Verify Patient Details

Lemon, Jodi  **Born** 06-Mar-2003(15 yr) **Sex** F **PHN** 999999992

Arrived 0 mins **Status**

5980 SE Oriental Court **Home** **BMI** 29.1 (98.1%) 1 wk 2 d **Primary** Janna S. Schreiber, ...

Work **Height** 190.0 cm (99.9%) 1 wk 2

Chart: 167727 **Demographic Data Last Updated:** 05-Oct-2016
Last Visit: 27-Sep-2018 **Demographic Data Last Verified:** 19-Nov-2012

☒ **Patient Data Verified** **Last recording:** 27-Sep-2018

Open Patient Maintenance **Close**

Miscellaneous enhancements

- If a patient has more than one advance directive (documents of type **Advance Directives**), the most recent now is now listed at the top.
- When changing a patient's status to an inactive status (such as deceased or left practice), all of the patient's incomplete follow-ups and notifications are now archived (and not only future ones).
- In the **Patient Maintenance > Billing** tab, you can now sort the list of bills. Click a column header to sort by that column, such as by service date or fee code. Click the column header again to sort in the reverse order. The default sort order remains by billing date in descending order.
- In **Patient Maintenance**, selecting the **Infant/Dependent** check box is now included in the audit log. This enables you to view reports of patient dependents within your clinic to avoid refused bills.
- In the **Referral Letter Composer**, if you are sending the referral via MedDialog, you can now edit the recipient via the referral detail.

Administration enhancement

- You can now see which version of the Multum medication database that your clinic is using. From the Wolf EMR home tab, choose **Help > MULTUM version** .

Performance enhancements

- Improved the performance of running a medication search in the legacy prescriber when using partial matches with a high degree of similarity.
- Improved the performance of merging and un-merging patients.

New or changed SMART forms

Canada forms

New	Update	SMART form name
X		Cannabis Requisition - MedReleaf

Fixes

Prov.	Wolf ID	Problem ID	Description
AB	WLF-112700	162116, 1095998	In the Service Summary report, an incorrect provider name appeared beside the provider totals.
AB	WLF-113128	167956, 899319	In the Service Summary report, the (Locum) label was incorrectly added in front of some fee codes.
All	WLF-217135	664251	When defining locations, excluding the space in the postal code generated the error "Error# 380 was generated by MaskedTextBox Invalid property value".
AB	WLF-222533	690575	In the Paid Summary accounting report, some fee codes were duplicated.

Prov.	Wolf ID	Problem ID	Description
All	WLF-224045		In Patient Maintenance, tabbing through the Consultant and Family Physician fields no longer launches a search.
All	WLF-221731	859742	In the scheduler, 24-hour time definition did not display properly in day and month view.
All	WLF-235910	1058863	In SMART form requisitions, the LocumFor bookmark incorrectly inserted the provider's ID instead of the locum's name.
All	WLF-236207		When using the patient portal, patients encountered an error when they chose to add an appointment to their calendar.
All	WLF-236425	1069673	In the new prescriber, when the patient's address line #1 contained long information, the patient's phone number was cut off in printed prescriptions
All	WLF-236786	1075085	When creating a new security group within the configuration, users were unable to save the new group.
AB and BC	WLF-236777	1121385	When configuring insurers (third parties) , changes to the fee schedule that contains the fee codes you bill to the insurer, were not saved.
All	WLF-237349	1086211	When editing patient lists from the scheduler and selecting the Include removed with history patients check box, the incorrect patient was removed in some situations.
BC	WLF-237492	1088592	In British Columbia, users were able to delete a patient or third-party bill that had a reversed payment applied
All	WLF-237886	1099080	If a patient matched a practice search rule as of today's date (such as an age-based rule on the patient's birthday), the rule match did not appear in the patient banner.
All	WLF-237890	1099842	In practice search results, including the Provincial Fee Code Last Service Date column forced users to select a user-defined field that had no options.
AB and BC	WLF-238232	1109243	Patient and third-party bills that were written off did not reflect the accurate written off amount based on the number of services.

Prov.	Wolf ID	Problem ID	Description
AB	WLF-238244	1110322	In Alberta, users were unable to delete a re-billed bill that was marked as refused by HLink.
All	WLF-238342	1114778	Opening the pharmacy address book from Patient Maintenance did not display the already saved pharmacy for the patient.
AB and BC	WLF-238360	1102731	In the Service Summary billing report, the insurer total was not displayed in some situations.
All	WLF-238374	1116426	Completed assessments were not appearing in bold within completed visit records.
